

## StandardTolerance\_table Liquid Silicone part\_tolerances

	Typical	Feasible
<b>Materials:</b>	Rubber Many types of polymers are available in different grades that vary greatly in chemical resistance. Contact us for more information.	
<u>Standard tolerance and molded part shrinkage:</u>	± .002in	
<u>Wall thickness down to:</u>	0.005in	

Note that the values represent normal production practice at the most economical level. Greater accuracy should only be specified where required to avoid additional prices. Disclaimer: All tolerance specifications reflect the approximate range of a process's capabilities and should be viewed only as a guide. Actual capabilities are dependent upon manufacturing, equipment, material, and part requirements.
