

StandardTolerance_table PolyJet Digital part_tolerances

	Typical	Feasible
Materials:	Rigid & rubber-like (Accuracy varies depending to geometry along with part orientation and print size)	
<u>Standard tolerance:</u>	0.00394-0.01181(inches) - (0.1-0.3 mm)	

Note that the values represent normal production practice at the most economical level. Greater accuracy should only be specified where required to avoid additional prices. Disclaimer: All tolerance specifications reflect the approximate range of a process's capabilities and should be viewed only as a guide. Actual capabilities are dependent upon manufacturing, equipment, material, and part requirements.
