

StandardTolerances_table Selective Laser Sintering (sls)

	Typical	Feasible
Materials:	Plastic Nylon-Like: DuraForm PA Plastic (Natural Color)	
Standard tolerance:	Layer Thickness: 0.004 ± 0.005 in.	General tolerances can be exceed after review of critical features with 2D-print.

Note that the values represent normal production practice at the most economical level. Greater accuracy should only be specified where required to avoid additional prices. Disclaimer: All tolerance specifications reflect the approximate range of a process's capabilities and should be viewed only as a guide. Actual capabilities are dependent upon manufacturing, equipment, material, and part requirements.
